

Piping Bags by Euro Malaysia

Piping Bags

Our disposable piping bags can fit to any size of nozzle or can be used on their own. Just fill the bag, snip the tip and away you go.

Euro recently developed hi-tack piping bags; the tackiness of film provides a firm grip to the cake decorators, hence making longer complicated icing jobs easier. The composition of this hi-tack piping bag's film is pioneering since it gets tackier with time (it is not sticky when manufactured but gets tackier with time, in order to provide the maximum grip to cake decorators). Currently, there are very few manufacturers who are capable of supplying these hi-tack piping bags on roll but Euro is among the first few ones who can manufacture these with flat single bag dispensing solution as well.

Piping Bags Blueprint

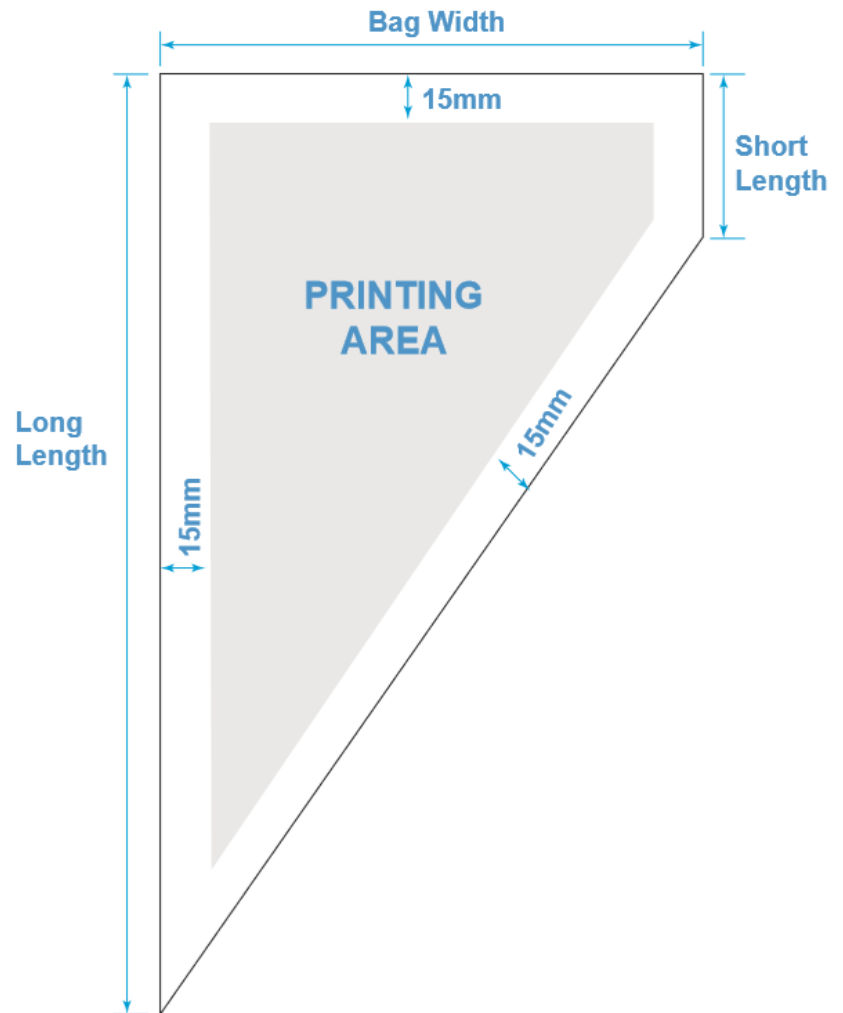

Our piping bags are manufactured in a variety of sizes and thicknesses, as per our customers` requirements.

Specification Range:

Length : 460mm - 610mm

Width : 230mm - 280mm

Thickness : 70-80 mu
